· Individual protection measure	es, such as personal protective equipment
General protective and	
hygienic measures	Keep away from food, drink and animal feed.
	Remove soiled, soaked clothing immediately.
	Wash hands before breaks and at the end of work.
	Avoid contact with eyes and skin.
<ul> <li>Breathing equipment:</li> </ul>	If workplace limit values cannot be complied with by ventilation
	measures or if rooms cannot be technically ventilated, respiratory
	protection must be worn: Use combination filter A1-P2 (brown/
	white) in rooms that cannot be ventilated. If oxygen deficiency is
	expected, use self-contained breathing apparatus. Observe
	wearing time limits according to §9 (3) GefStoffV in conjunction
	with BGR 190.
· Hand protection	Selection of the glove material on consideration of the penetration
	times, rates of diffusion and the degradation
· Material of gloves	You can find help with choosing gloves on the website https://
	www.bgbau.de/fileadmin/Gisbau/Projekte.pdf
	For example, we recommend the Sol-vex 37-900 protective gloves
	from Ansell GmbH. The breakthrough time of the protective gloves
	can be found under point 8 "Penetration time of the glove material".
	The selection of a suitable glove depends not only on the material,
	but also on other quality features and varies from manufacturer to
	manufacturer. As the product
	is a preparation of several substances, the resistance of glove
	materials cannot be calculated in advance and must therefore be
	checked before use.

Penetration time of glove material	The breakthrough times of the Sol-vex 37-900 protective gloves are around 8 hours. The following applies to all other gloves: The exact breakthrough time must be obtained from the protective glove manufacturer and adhered to. Nitrile rubber Material thickness: $\geq 0.40$ mm Penetration time: $\geq 480$ min Butyl rubber: Material thickness: $\geq 0.5$ mm Penetration time: $\geq 480$ min
· Eye/face protection	Tight-fitting safety goggles. Safety goggles.
Body protection:	Protective clothing Suitable protective clothing should be worn when working with epoxy resins. In addition to normal work clothing (long trousers, long-sleeved shirt or T-shirt), disposable overalls, aprons, overshoes, sleeve protectors etc. may be necessary depending on the activity. Uncovered areas of skin should be avoided as far as possible, even in hot weather. If the work involves kneeling, the lower leg area should be protected by protective trousers.
