Wash hands during breaks and at the end of the work.
Avoid contact with the eyes.

· **Breathing equipment:**

Wear respiratory protection in case of insufficient ventilation.
The selection of respirators (EN 14387) must be based on the known or anticipated exposure concentrations, the hazards of the product and the occupational exposure limits (section 8.1) of the respirator in question.
Particle filter PP1: Inert substance; P2, P3: Hazardous substances
Provide adequate ventilation. This can be achieved by local exhaust ventilation or general exhaust ventilation.
(EN 689 - Methods for determining inhalation exposure)
This applies especially at the mixing or stirring place.
If this is not sufficient to keep the concentration below the occupational exposure limit, provide respiratory protection.

Protective gloves.
Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
After use of gloves apply skin-cleaning agents and skin cosmetics.

· **Material of gloves**

Nitrile rubber, NBR
Butyl rubber, BR
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· **Penetration time of glove material**

The exact breakthrough time must be obtained from the protective glove manufacturer and must be observed.

· **Eye/face protection**

Tightly sealed safety glasses.

· **Body protection:**

Protective work clothing.
